Summary

Adaptable and positive-minded full-stack software engineer with **3 years of experience**. Skilled in **Typescript, React, Node.js, SQL, API** designs and testing.

With a keen eye for details, enthusiastic about clean and reusable UX/UI, as well as performant and secure API.

Career History

Full-stack Software Engineer at Stormrake

Jun 2025 – Present

Built a **responsive** and **performant** client portal with efficient and secure APIs.

Key responsibilities

- Develop and optimise reusable front-end components using TypeScript, React, and Material UI.
- Built a file upload pipeline with **AWS S3 bucket** and file table processors.
- Design and create secure API endpoints using Node.js, **AWS Lambda**, GraphQL and DynamoDB.

Achievements

- Pioneered the launch of the client portal with more than 3,000 customers. Built and maintained the deposit, withdrawal, and activity history functionalities on the client portal.
- Developed an automated **Deposit flow** that enables the trading team to credit customer accounts in one button click. Minimising manual input error, and reducing processing time by 90%

Software Developer at Doohly

Jun 2023 – Jun 2025

Developed and optimized **responsive, performant, and reusable** front-end components and back-end APIs within a monorepo environment, contributing to **secure** and **scalable** platform growth.

Key responsibilities

- Built and maintained reusable front-end components using TypeScript, React, Ant Design, and CSS.
- Developed a robust user permission and resource group management system for enhanced fine-grained access control.
- Designed and created RESTful API endpoints using Node.js, TypeORM, and PostgreSQL.

Achievements

- Contributed to **over 100% annual revenue growth** by delivering performant and maintainable features requested by clients
- Designed **complex dynamic forms** and **draggable table components**, improving user experience.
- Improved platform reliability and code quality with thorough **unit and integration testing with Jest**.

IT Support Specialist at Mayland Group Ltd (Hong Kong)

Oct 2018 – Jan 2021

Troubleshoot hardware and software issues, create HTML email template and install and configure systems

Education

Immersive Software Engineering

General Assembly Melbourne

Graduated 2022

Masters of Agricultural Sciences - H1 First Class Honours

University of Melbourne

Graduated 2022

Integrated Masters of Information Management for Business - 2:1 Upper Second Class Honours

University College London

Graduated 2018
